

Nocart Oy announces the Appointment of New Board of Directors

Nocart Oy has nominated a new board of directors at its Annual General Meeting. Nocart is a Finland-based sustainable energy company that delivers environmentally conscious energy solutions and power plants. The company's board will consist of Jarkko Joki-Tokola (Chairman), Thomas Bengtsson, Pekka Pylkäs, and Vesa Korhonen, the company's CEO and founder. Joki-Tokola, Bengtsson and Pylkäs join Nocart's board as new members.

Joki-Tokola is an internationally experienced start-up and growth company executive, investor, and entrepreneur, and has spent over ten years living and working in the United States. Joki-Tokola's professional history includes companies like Fortum, Sonera, CRF Health, and Lifeline Ventures. He holds M.Sc. Engineering from Helsinki University of Technology.

"Nocart is a leading-edge sustainable energy company that is going through a critical period in its growth. Together with the acting leadership and the entire Nocart team, I am committed to work hard to help set the company on a positive track", new Chairman Jarkko Joki-Tokola states.

Pekka Pylkäs is an independent advisor for industrial and investor customers related to corporate planning, structure updates, and M&A realisation. He has previously held various corporate finance and control positions in international corporations like Digital Equipment Corporation, Measurex, Esselte DataTime, Nokia, and Swisslog Management.

Thomas Bengtsson is the executive Chairman of Loudspring and a board member of Enersize. Additionally, Bengtsson runs his own company that produces electricity from wind power. Bengtsson has previously served as the vice CoB of Industrifonden and held various positions at the Swedish Ministry of Enterprise and the European Commission. He has M.Sc in Economics from University of Lund, and has executive education in Corporate Finance from IFL, Stockholm School of Economics.

Vesa Korhonen, CEO, Nocart Oy.
